- **Crystal Talent Solutions Course "JAVA"Apr 2022 - Jun 2022**  
Crystal Systems

## Experience

### **Codevider**-Junior Backend Developer [March-2023] - [August-2023] *Tirana City*

- Contributed to the development of a Customer Relationship Management (CRM) system.
- Collaborated with the development team to design and implement backend solutions.
- Utilized Node.js and Express.js to create robust and efficient server-side applications.
- Worked with MongoDB to manage and store data, ensuring data integrity and scalability.
- Implemented Redis for caching and improving system performance.
- Gained hands-on experience with Nest.js, a modern TypeScript framework for building scalable and maintainable applications.
- Collaborated closely with front-end developers and UX/UI designers to ensure seamless integration of backend services.
- Participated in code reviews, bug fixes, and troubleshooting to maintain code quality and application stability.
- Worked in an Agile development environment, following best practices and meeting project deadlines.

### **GDSC Lead**-Google Developers [Aug 2021] - [Jun 2023] *Durres, Albania*

- During this position, I created a student club at my university, made it a global community that connected Albanian students across the globe. The goal was to raise awareness about technology and educate the youth of Albania by organizing free code camps throughout the year, workshops, social events, and interviews with professionals.
